Orgnization Briefing	<p>China Carbon is headquartered in Amsterdam, the Netherlands, with an equally strong presence in China. We are active in sourcing and developing emission reduction credits in China together with our partners. Until now we have contracted large quantities of potential CERs for our carbon pool. This carbon pool offers the following distinct advantages to project developers, such as risk mitigation, economy of scale benefits and no penalties in case of project failure In addition China Carbon can offer an attractive ERPA with a competitive CER price and financing for project-related immaterial expenses and / or upfront payments.</p>
